Country Music Records Tony Russell,Bob Pinson,2004-10-07 More than twenty years in the making, Country Music Records documents all country music recording sessions from 1921 through 1942. With primary research based on files and session logs from record companies, interviews with surviving musicians, as well as the 200,000 recordings archived at the Country Music Hall of Fame and Museum's Frist Library and Archives, this notable work is the first compendium to accurately report the key details behind all the recording sessions of country music during the pre-World War II era. This discography documents--in alphabetical order by artist--every commercial country music recording, including unreleased sides, and indicates, as completely as possible, the musicians playing at every session, as well as instrumentation. This massive undertaking encompasses 2,500 artists, 5,000 session musicians, and 10,000 songs. Summary histories of each key record company are also provided, along with a bibliography. The discography includes indexes to all song titles and musicians listed.

Bone Research Protocols Miep H. Helfrich, Stuart H. Ralston, 2008-02-01 The last decade has seen a tremendous advance in our understanding of bone biology. The genes responsible for the majority of rare inherited bone disorders have been identified and much progress has been made in the identification of genes in polygenic disorders such as Paget's disease and complex multigene diseases such as osteoporosis. Transgenic technology has identified further genes, sometimes unexpectedly, with profound effects on bone. This wealth of new genetic information will undoubtedly lead to extensive cell biological studies to understand the mechanisms by which these gene products affect bone mass and bone strength. In Bone Research Protocols a catalogue of protocols has been assembled to perform such mechanistic studies. In the tradition of the Methods in Molecular Medicine series, the chapters are practical laboratory protocols that should enable the reader to carry out the techniques from scratch. To our knowledge this is the first time such a truly practical manual on well-established bone methods has been assembled, and this volume aims to be complementary to and follow on from the more theoretical Methods in Bone Biology, edited by Arnett and Henderson (1).

Perceval and Gawain in Dark Mirrors Rupert T. Pickens, 2014-10-01 An innovative author of verse romance, Chrétien de Troyes wrote in northern France between 1170 and 1190. Credited with the first Arthurian romance, he composed five works set in King Arthur's court, culminating with an unfinished masterpiece, the Conte del Graal (Story of the Grail). This text is the first to mention the banquet serving dish that became the Holy Grail in early efforts to rewrite or complete the text. This

book focuses on the Conte's narrative depiction of mirrors real and metaphorical: shining armor, a polished golden eagle, the Grail itself, St. Paul's enigmatic looking glass, the blood drops in snow in which Perceval sees the face of his beloved. The last chapter joins the controversy over Chrétien's intended conclusion, and proposes a climactic ending in which Perceval, heir to the Grail kingdom, confronts his double, Gawain, heir to Arthur's Logres.

The Phoebe A. Hearst Expedition to Naga ed-Deir, Cemeteries N 2000 and N 2500 Vanessa Davies, 2020-11-16

The Phoebe A. Hearst Expedition to Naga ed-Deir, Cemeteries N 2000 and N 2500 presents the results of excavations directed by George A. Reisner and led by Arthur C. Mace. The site of Naga ed-Deir, Egypt, is unusual for its continued use over a long period of time (c. 3500 BCE-650 CE). Burials in N 2000 and N 2500 date to the First Intermediate Period/Middle Kingdom and the Coptic era. In keeping with Reisner's earlier publications of Naga ed-Deir, this volume presents artifacts in chapter-length studies devoted to a particular object type and includes a burial-by-burial description. The excavators' original drawings, notes, and photographs are complemented by a contemporary analysis of the objects by experts in their subfields.
