Ritual Abuse and Mind Control Orit Badouk Epstein, 2018-03-22 People who have survived ritual abuse or mind control experiments have often been silenced, accused of lying, mocked and disbelieved. Clinicians working with survivors often find themselves isolated, facing the same levels of disbelief and denial from other professionals within the mental health field. This report - based on proceedings from a conference on the subject - presents knowledge and experience from both clinicians and survivors to promote understanding and recovery from organized and ritual abuse, mind control and programming. The book combines clinical presentations, survivors' voices, and research material to help address the ways in which we can work clinically with mind control and cult programming from the perspective of relational psychotherapy.

Food Biochemistry and Food Processing Y. H. Hui, Wai-Kit Nip, Leo M. L. Nollet, Gopinadhan Paliyath, Benjamin K. Simpson, 2008-02-15 The biochemistry of food is the foundation on which the research and development advances in food biotechnology are built. In *Food Biochemistry and Food Processing*, lead editor Y.H. Hui has assembled over fifty acclaimed academicians and industry professionals to create this indispensable reference and text on food biochemistry and the ever-increasing development in the biotechnology of food processing. While biochemistry may be covered in a chapter or two in standard reference books on the chemistry, enzymes, or fermentation of food, and may be addressed in greater depth by commodity-specific texts (e.g., the biotechnology of meat, seafood, or cereal), books on the general coverage of food biochemistry are not so common. *Food Biochemistry and Food Processing* effectively fills this void. Beginning with sections on the essential principles of food biochemistry, enzymology and food processing, the book then takes the reader on commodity-by-commodity discussions of biochemistry of raw materials and product processing. Later sections address the biochemistry and processing aspects of food fermentation, microbiology, and food safety. As an invaluable reference tool or as a state-of-the-industry text, *Food Biochemistry and Food Processing* fully develops and explains the biochemical aspects of food processing for scientist and student alike.

Guns, An American Conversation The Editors at Spaceship Media, 2020-10-13 From Pulitzer Prize-winning reporters: Can complete strangers representing every point along the political divide engage in civil and productive discourse on the topic of gun control? As Americans, we spend a lot of time talking about guns. With the political division in the country, evidenced by the Capitol insurrection and voter fraud protests, it's not surprising that we rarely have real conversations with people whose ideas don't align with ours about gun ownership. Democrats and liberals usually talk with other Democrats and liberals, not Republicans and conservatives. That is, perhaps, why the country is so divided when it comes to reducing gun violence. *Guns, an American Conversation* features the results of a fascinating nationwide conversation about guns. A group of 150 strangers were brought together in a month-long moderated Facebook group chat. They featured teachers, Second Amendment advocates, hunters, police officers, and mothers and fathers from across the political spectrum and the fifty states. Together, they participated in a project meant to foster civil, yet honest, dialogue between people whose backgrounds and beliefs led them to have opposing views on the issue of gun control. *Guns* attempts to map out common territory in a nation driven by profound divides. It includes real information about gun laws in the United States, providing the reader with tools to continue the discussion in their own lives. With sidebars, charts, and graphics that are clear and easy to navigate, *Guns* might not change your mind about gun control, but it will help you learn to cross divides in conversation as America navigates the way forward on this difficult issue.

Dance as Text Mark Franko, 2015 This is a historical and theoretical examination of French baroque court ballet from approximately 1573 until 1670. Spanning the late Renaissance and the Baroque, it brings aesthetic and ideological criteria to bear on court ballet libretti, period accounts, contemporaneous performance theory, and related commentary on dance and movement in literature. It studies the formal choreographic apparatus that characterises late Valois and early Bourbon ballet spectacle and how its changing aesthetic ultimately reflected the political situation of the nobles who devised et performed court ballets.

Young, Gifted and Black Theresa Perry, Claude Steele, 2012-09-11 Young, Gifted, and Black is a unique joint effort by three leading African-American scholars to radically reframe the debates swirling around the achievement of African-American students in school. In three separate but allied essays, Theresa Perry, Claude Steele, and Asa Hilliard place students' social identity as African-Americans at the very center of the discussion. They all argue that the unique social and cultural position Black students occupy, in a society which often devalues and stereotypes African American identity, fundamentally shapes students' experience of school and sets up unique obstacles. And they all argue that a proper understanding of the forces at work can lead to practical, powerful methods for promoting high achievement at all levels. Theresa Perry argues that African-American students face dilemmas, founded in the experience of race and ethnicity in America, that make the task of achievement distinctive and difficult. (For instance: How do I commit myself to achieve, to work hard over time in school, if I cannot predict when or under what circumstances this hard work will be acknowledged and recognized?) She uncovers a rich and powerful African- American philosophy of education, historically forged against such obstacles and capable of addressing them, by reading African-American narratives from Frederick Douglass to Maya Angelou. She carefully critiques the most popular theoretical explanations for group differences in achievement. And she lays out how educators today-in a postcivil rights era-can draw on theory and on the historical power of the African-American philosophy and tradition of education to reorganize the school experience of African-American students. Claude Steele reports stunningly clear empirical psychological evidence that when Black students believe they are being judged as members of a stereotyped group rather than as individuals, they do worse on tests. He finds the mechanism, which he calls stereotype threat, to be a quite general one, affecting women's performance in mathematics, for instance, where stereotypes about gender operate. He analyzes the subtle psychology of stereotype threat and reflects on the broad implications of his research for education, suggesting techniques-based again on evidence from controlled psychological experiments-that teachers and mentors and schools can use to counter stereotype threat's powerful effect. Asa Hilliard's ends essay, against a

variety of false theories and misguided views of African American achievement, and focuses on actual schools and programs and teachers around the country that allow African-American students achieve at high levels, describing what they are like and what makes them work. Young, Gifted, and Black will change the way we think and talk about African American student achievement and will be necessary reading on this topic for years to come.

Biochemistry of Foods N.A.M. Eskin, 2012-12-02 Biochemistry of Foods attempts to emphasize the importance of biochemistry in the rapidly developing field of food science, and to provide a deeper understanding of those chemical changes occurring in foods. The development of acceptable fruits and vegetables on postharvest storage is dependent on critical biochemical transformations taking place within the plant organ. The chapters discuss how meat and fish similarly undergo postmortem chemical changes which affect their consumer acceptability. In addition to natural changes, those induced by processing or mechanical injury affect the quality of foods. Such changes can be controlled through an understanding of the chemical reactions involved, for instance, in enzymic and nonenzymic browning. Increased sophistication in food production has resulted in the widespread use of enzymes in food-processing operations. Some of the more important enzymes are discussed, with an emphasis on their role in the food industry. The final chapter is concerned with the biodeterioration of foods. The various microorganisms involved in the degradation of proteins, carbohydrates, oils, and fats are discussed, with special reference to the individual biochemical reactions responsible for food deterioration.

Ancient Dramatic Chorus through the Eyes of a Modern Choreographer Katia Savrami, 2017-01-06 This book critically analyses the work of Zouzou Nikoloudi, a major Greek choreographer (1917–2004), and the way she presented, with her company Chorica, the choral odes of ancient Greek drama, especially tragedy. It also sheds light on the theoretical underpinnings of Nikoloudi's choreographic work, the result of her own research on this central problem in contemporary performances of ancient Greek drama, particularly the manner in which the ancient Greek chorus may be revived. More specifically, the book provides answers to several key questions concerning Nikoloudi's work, namely: What were her views about ancient dramatic art and how were they influenced by the School of Koula Pratsika and Expressionist Dance? Which elements from her own training did she apply to her teaching method for actors and dancers and to what extent do these elements correspond to our existing knowledge about ancient Greek tragic drama? How did she integrate her embodied experiences and aesthetics into praxis while choreographing with her company? The book examines the work of Nikoloudi in relation to ancient Greek views of tragedy and the ways in which those views have been reinterpreted in contemporary dance practice, thus elucidating both the work of a distinguished twentieth-century Greek choreographer and our understanding of classical Greek aesthetic theories.

The Secret Life of the Cheating Wife Alicia M. Walker, 2017-10-24 Using a sample collected from Ashley Madison, this book is the result of a yearlong inquiry into women's extramarital experiences. Ultimately, these women reject the binary proposition of marriage that assumes that either we work on our marriages and remain monogamous within them, or we break up the relationship and take up other relationships. These women conceive of an alternate solution to a marriage that is not wholly working, where their own needs are ignored, unmet, and not prioritized. Thus, the women in this study are engaging in secret defiance of the expectations of marriage and primary partnerships. This book gives voice to women's experiences and perceptions regarding their participation in infidelity, and glimpses into the interworkings of our most intimate relationships, and the ways women negotiate marriages that fall short of their expectations.

Have I Got a Story for You: More Than a Century of Fiction from The Forward Ezra Gliner, 2016-11-01 A Finalist for the 2016 National Jewish Book Award Forty-two stories from America's greatest Yiddish newspaper, in English for the first time. The Forward, founded in 1897, is the most renowned Yiddish newspaper in the world. It welcomed generations of immigrants to the United States, brought them news of Europe and the Middle East, and provided them with sundry comforts such as comic strips and noodle kugel recipes. It also published some of the most acclaimed Yiddish fiction writers of all time: Nobel

Prize laureate Isaac Bashevis Singer on justice slyly being served when the governor of Lublin comes to town; celebrated Forward editor Abraham Cahan on how place and luck can change character; and Roshelle Weprinsky, setting her story in Florida, on the rupture between European parents and American children. Cahan described the newspaper as a “living novel,” with good reason. Taken together, these stories reveal the human side of the challenges that faced Jews throughout this time, including immigration, modernization, poverty, assimilation, the two world wars, and changing forms of Jewish identity. These concerns were taken up by a diverse group of writers, from novelists Sholem Asch and Chaim Grade to short-story writers like Lyala Kaufman and Miriam Karpilove. Ezra Gliner has combed through the archives to find the best stories published during the newspaper’s 120-year history, digging up such varied works as wartime novellas, avant-garde fiction, and satirical sketches about immigrant life in New York. Gliner’s introductions to the thematic sections and short biographies of the contributors provide insight into the concerns of not only the writers but also their avid readers. The collection has been rendered into English by today’s best Yiddish translators, who capture the sound of the authors and the subtleties of nuance and context.
