The Psychology of the Selfie Barrie Gunter,2021-09-01 The Psychology of the Selfie provides a comprehensive overview and analysis of research on the significance of selfies, offering insights into the topic from a psychological perspective and examining important issues such as body image, self-objectification, mental health and psychological benefits. Selfies are a worldwide phenomenon. Although dismissed by critics as a sign of self-absorbed narcissism, they are also a social currency that maintains and reinforces friendships, a feedback loop for self-identity affirmation, a promotional tool for gaining social influence, and a method for preserving memories of life events. In this book, Barrie Gunter expertly explores the psychological underpinnings of the contemporary global phenomenon of selfies, from the historical roots and meteoric rise due to technical advancements, to the different personality types of selfie-takers, to social relationships, to group and personal identity. Looking at both the psychological nature and impact of selfies, this book reviews different psychological outcomes for selfie-takers, both positive and negative, and the growth in psychological and physical problems that can sometimes arise. Presenting a comprehensive analysis specifically of selfie behaviour, this book is an essential reference for students and researchers in communications and media, journalism, information studies, psychology and sociology, as well as anyone with a general interest in the phenomenon.

Optics and Lasers in Biomedicine and Culture C. Fotakis,T.G. Papazoglou,C. Kalpouzos,2012-12-06 Following the previous OWLS conferences devoted to optics in life sciences, the 5th Conference focused on recent achievements in applying lasers and optics in biomedicine and in the preservation of our cultural heritage. Particular attention is thus paid to laser diagnostics in medicine, interaction of laser radiation with biological tissue, and the development of new systems for these studies. The contributors to this volume cover such international research activities as photon migration in tissue, fibre optics, lasers in dermatology, ENT, cardiology, and in art conservation, imaging techniques in archaeology, laser technologies in contemporary art, and new laser and opto-electronic systems for biomedical and art-related studies.

Utter's Battalion Alex Lee,2000-01-04 In May 1965, the entire 2nd Battalion, 7th Marine Regiment--lock, stock, and barrel--embarked for Vietnam. Captain Alex Lee was there. . . . Now combat-veteran Marine captain Alex Lee brings to gritty life the full tour of 2/7. From the search-and-destroy missions to the sudden violent ambushes in the hills and valleys west of Qui Nhon, Lee describes how Marines battled monsoons, malaria, and the enemy as they crept through terrain infested with Viet Cong caves and hideouts. After paving the way in Qui Nhon for the arrival of more American military, 2/7 was assigned to Chu Lai, where the battalion fought its most bitter, deadly battles. With the scalding ring of truth, Lee captures the conditions of the bone-weary 2/7 Marines as they slogged through jungles and spent night after night in dreary, rain-filled foxholes. Although they faced a life of constant danger and occasional mindless confusion, in their seemingly endless marathon of effort, agony, and sacrifice, the Marines of 2/7 never faltered, never stopped giving their best.

Oldest Stories in the World Theodor H. Gaster, 2018-09 This book was assembled by a scholar of language and religion in order to bring together the best collection of the oldest stories known to man. They are older than anything in the Bible, or than Homer, or than the epic poems of India. They were recovered from the ruins of ancient cities and were originally written and told by the Assyrians and Babylonians of Mesopotamia, as well as the Hittites and Canaanites. There are 13 stories in all, some of which the reader will recognize, but others that are rarely or never seen anywhere else. Stories, in their order of appearance, are: The Adventures of Gilgamesh, The War of the Gods, Borrowed Plumes, The Lost Chance, How Toothache Came into the World, The God Who Disappeared, The Monster Made of Stone, The Snaring of the Dragon, Kessi and Huntsman, Master Good and Master Bad, The Heavenly Bow, The King Who Forgot, and The Story of Baal. The author was once the chief of the Hebraic section of the Library of Congress and the first to do a complete translation of the Dead Sea Scriptures in English. An invaluable bonus is that he shares his vast knowledge and expertise after each story with a commentary, including cross-cultural comparisons and a host of other interesting facts. For example, after The Story of Baal he tells us that the main story came from cuneiform tablets in Syria, but its' ending was discovered on a fragment of papyrus in Egypt. This book is essential for those researching the first cultures of mankind or the earliest stories of the gods.
