**500 Wedding Rings** Lark Books, Marthe Le Van, 2007 Presents a wide range of creative wedding ring designs from the world's most innovative designers and jewelers, showcasing a collection of contemporary, handmade wedding bands and engagement rings for both men and women by Etienne Peret, James Kaya, and other artists.

**The Engagement Ring Guide For Men: Everything You Should Know Before Popping The Question** Michael Khordipour, Afshin Shaddaie, Benjamin Khordipour, 2019-11-12 An easy-to-read book that will help you navigate through one of the biggest moments (and purchases) of your life. Khordipour and Shaddaie of Estate Diamond Jewelry have been selling vintage rings and jewelry for decades, and throughout all that time they kept seeing the same problem pop up: most guys who are looking to buy an engagement ring enter the store with almost no prior knowledge. They are completely at the mercy of the jeweler. Most men don't even know what the word carat actually means. Important words like filigree, fluorescence, bezel-set, milgrain, or polished girdle are like a completely different language to them. Last year, however, Khordipour and Shaddaie decided that they were going to fix this problem. They set out to write a book that would provide all the answers that someone would need to know before buying their engagement ring. Here is what you can expect to learn from this book: A Complete Education on Diamonds Tips to Saving Money on Your Ring An Overall Jewelry Education How to Propose Successfully? Engagement Ring Customs and Traditions How to Figure Out Her Style Discover if you're Ready to Get Married?

Blue Nile, Inc Alan Nathan Hoffman, 2011 Built on the premise of making engagement rings selection simpler, Blue Nile, Inc. (formerly known as Internet Diamonds, Inc.) has developed into the largest online retailer of diamond engagement rings. Unlike traditional jewelry retailers, Blue Nile operates completely store-front-free, without in-person consultation services. The business conducts all sales online or by phone and sales include both engagement (70%) and non-engagement (30%) categories. Therefore, the company focuses on perfecting its online shopping experience and providing extraordinary jewelry, useful guidance, and easy-to-understand jewelry education to help you find the jewelry that's perfect for your occasion. Blue Nile's vision is to educate its customer base so that customers can make an informed, confident decision no matter what event they are celebrating. It wants to make the entire diamond-buying-process easy and hassle-free. In addition, an important part of Blue Nile's vision, as CEO Diane Irvine said in a recent webinar with Kaihan Krippendorf, is for the

company to be seen as the smart way to buy diamonds, while saving 20-40% more than one would in the typical jewelry store. Blue Nile is working to become the Tiffany for the next generation.

**FRP Technology** R. Weatherhead, 2012-12-06 Synthetic resins have become increasingly important over the years, finding wide application in a variety of fields. Not least have been the tremendous strides made in the use of fibre reinforced resin systems. Although by far the bulk of all fibre reinforced products are made from unsaturated polyester resins reinforced with glass fibres, other resins and other fibres are playing an increasingly important role. It is with this in mind that the present book has been written. An attempt has been made to combine within one book information on the various resin systems and reinforcing fibres in use today, together with some properties and processing details. Since most of the resins available are formulated products rather than pure chemical compounds, some information has been included on commercially available materials. For convenience, where commercial data have been included, these have been located at the end of the appropriate chapter or, where only limited data are presented, at the end of the appropriate section. Such data have been included for the benefit of designers and fabricators, to indicate the wide choice of materials available and to enable them to select materials without having to approach a vast number of suppliers and then to sift through an even greater number of data sheets.

**Materials for Low-Temperature Fuel Cells** Bradley Ladewig, San Ping Jiang, Yushan Yan, 2015-03-09 There are a large number of books available on fuel cells; however, the majority are on specific types of fuel cells such as solid oxide fuel cells, proton exchange membrane fuel cells, or on specific technical aspects of fuel cells, e.g., the system or stack engineering. Thus, there is a need for a book focused on materials requirements in fuel cells. *Key Materials in Low-Temperature Fuel Cells* is a concise source of the most important and key materials and catalysts in low-temperature fuel cells. A related book will cover key materials in high-temperature fuel cells. The two books form part of the *Materials for Sustainable Energy & Development* series. *Key Materials in Low-Temperature Fuel Cells* brings together world leaders and experts in this field and provides a lucid description of the materials assessment of fuel cell technologies. With an emphasis on the technical development and applications of key materials in low-temperature fuel cells, this text covers fundamental principles, advancement, challenges, and important current research themes. Topics covered include: proton exchange membrane fuel cells, direct methanol and ethanol fuel cells, microfluidic fuel cells, biofuel cells, alkaline membrane fuel cells, functionalized carbon nanotubes as catalyst supports, nanostructured Pt catalysts, non-PGM catalysts, membranes, and materials modeling. This book is an essential reference source for researchers, engineers and technicians in academia, research institutes and industry working in the fields of fuel cells, energy materials, electrochemistry and materials science and engineering.

**Contest for Liberty** Seanegan P. Sculley, 2019 Winner of the 2019 Army Historical Foundation Distinguished Writing Award in Institutional History How American Colonial Ideals Shaped Command, Discipline, and Honor in the U.S. Armed Forces In the summer of 1775, a Virginia gentleman-planter was given command of a New England army laying siege to British-occupied Boston. With his appointment, the Continental Army was born. Yet the cultural differences between those serving in the army and their new commander-in-chief led to conflicts from the very beginning that threatened to end the Revolution before it could start. The key challenge for General George Washington was establishing the standards by which the soldiers would be led by their officers. What kind of man deserved to be an officer? Under what conditions would soldiers agree to serve? And how far could the army and its leaders go to discipline soldiers who violated those enlistment conditions? As historian Seanegan P. Sculley reveals in *Contest for Liberty: Military Leadership in the Continental Army, 1775-1783*, these questions could not be determined by Washington alone. His junior officers and soldiers believed that they too had a part to play in determining how and to what degree their superior officers exercised military authority and how the army would operate during the war. A cultural negotiation concerning the use of and limits to military authority was worked out between the officers and soldiers of the Continental Army; although an unknown concept at the time, it is what we call leadership today. How this army was led and how the interactions between officers and soldiers from the various states of the new nation changed their understandings of the proper exercise of military authority was finally codified in General Friedrich Wilhelm von Steuben's *The Regulations for the Order and Discipline of the Troops of the United States*, first published in 1779. The result was a form of military leadership that recognized the autonomy of the individual soldiers, a changing concept of honor, and a new American tradition of military service.

Clusters and Superclusters of Galaxies A.C. Fabian,2012-12-06 Clusters and superclusters of galaxies are the largest objects in the Universe. They have been the subject of intense observational studies at a variety of wavelengths, from radio to X-ray which has provoked much theoretical debate and advanced our understanding of the recent evolution of the large-scale structure of the Universe. The current status of the subject is reviewed in this volume by active researchers who lectured at a NATO Advanced Study Institute held in Cambridge, England in July 1991. Much of the material is presented in a pedagogical manner and will appeal to scientists, astronomers and graduate students interested in extragalactic astronomy.

*Prejudice, War, and the Constitution* Jacobus tenBroek,Edward N. Barnhart,Floyd W. Matson,1954 During World War II, 110,000 citizens and resident aliens of Japanese ancestry were banished from their homes and confined behind barbed wire for two and a half years. This comprehensive work surveys the historical origins, political characteristics, and legal consequences of that calamitous episode. The authors describe the myths and suspicions about Orientals on the West Coast and trace the influence of racial bigotry in the evacuation and in the court cases growing out of it. A theory is advanced to account for the administrative and legal decisions which initiated and concluded this calamity. Finally, the authors analyze the principal constitutional issues involved in the evacuation and their implications for the future.
