Contemporary Lesley Jackson, 2000 This book provides a full definition and examination of the Contemporary style that was to dominate architecture and design throughout the 1950's. It shows the ways in which these new ideas pervaded all aspects of the market, from handcrafted one-offs to the mass-produced industrial item, and all areas of design, from home decoration to public buildings. Far more than a collection of fifties nostalgia, this volume provides an entertaining and revealing survey of trends in taste and interior design at a time of economic regeneration and social renewal. It shows how the positive spirit of the age was reflected in the buoyant and confident creative expression of its buildings and domestic furnishings.
