Progress in Basic and Clinical Immunology Andrzej Mackiewicz, Maciej Kurpisz, Jan Zeromski, 2012-11-05 Progress in Basic and Clinical Immunology is a result of the 14th European Immunology Meeting - EFIS 2000, held in Poznan, Poland, on 23-27 September 2000. EFIS 2000 gathered over 1400 immunologists from all over the world. It was an exceptionally memorable meeting for a number of reasons: 1) it was held in the last year of the century and the millennium, thus provoking conclusions of past achievements of immunology and projections for the future; 2) it was held in Poland, a country that is a symbol of struggle for freedom for a large number of scientists originating from the 'Eastern Bloc' countries; and 3) EFIS celebrated its 25th anniversary at this occasion. This comprehensive volume contains 62 chapters grouped into 11 sections: T-cells, Immune Receptors, Antigen Presentation/Dendritic Cells, Cytokines, Immunodeficiencies, Autoimmunity, Allergy/Inflammation, Immunotherapy, Vaccines, Tumor Immunology, and Cancer Immunotherapy.

Landfill Engineering Geoffrey B. Card,2015-01-15 A complete reference on all aspects of landfill engineering including landfill characteristics, measuring, analysis and modelling of landfill behaviour, recycling materials and landfill design; this handbook is a vital source of information on current methods of landfill use and management. Environmental pressures and changes in legislation, such as the EU Landfill Directive, are forcing us to rethink our attitudes towards landfill. The

necessity of diverting and separating biodegradable domestic waste from hazardous waste, as well as an increased emphasis upon recycling waste materials is changing the engineering properties of landfill, which are a function not only of their physical characteristics, but also the chemistry of degradation. Increasing government pressure to redevelop brownfield land is driving the redevelopment of closed landfill sites, prompting engineers to reconsider the disposal of waste in new sites to enable their safe redevelopment in the future. This is a significant challenge; the engineering questions are considerable and have not been addressed in the literature to date. This book is an essential reference on the engineering of landfill materials, providing safe solutions to engineering problems from the construction and development of new landfill facilities, to the reuse and development on closed sites.
