Diamond Kerry G Davis,2019-07-23 Diamond represents every child that has a talent, but lacks the support and confidence to share that talent with the world. Sometimes people see the rough more than they see the diamond. It takes a special person to see the diamond in the rough.

Diamond Matthew Hart,2010-06 For centuries, diamonds have symbolized wealth, prestige, and love. But behind those symbols lies a world of deceit, monopoly, and war. Today, although 85% of American women own a diamond, the diamond trade remains one of the world's most mysterious businesses. Hart follows the diamond trail around the globe. He records the heroic struggle of the 24-year-old woman who discovered a multibillion-dollar diamond mine on the Arctic Circle and describes the company that feared her most -- De Beers, masterminds of the great diamond cartel. Combining history, science, business, and adventure, this book captures the essence of this priceless gem and the world that surrounds it. Illustrations.

Rocks, Ice and Dirty Stones Marcia Pointon,2017-03-15 The king of stones, valued since antiquity for their unrivalled

hardness, diamonds today are both desired and deplored. Once faceted and polished they glitter on the fingers of brides-to-be and in the ornaments of the super-rich, but their extraction from some of the world's poorest countries remains contentious. Immensely valuable for their size, diamonds can be easily hidden and transported, making them perfect contraband. Diamonds have been widely used in industry since the nineteenth century and have long been valued for their pharmaceutical and prophylactic properties. This entertaining and richly illustrated book examines the history of the diamond trade through the centuries from India and Brazil to South Africa and Europe and investigates what happens to diamonds once they reach the cutters and polishers. Marcia Pointon takes the reader on a unique tour of the ways in which the quadrahedron diamond shape has inspired design, architecture, and painting, from the symbolism of medieval manuscripts to modern-day graffiti. She questions the etiquette of engagement rings, and she reminds us why and how lost, stolen, or cursed diamonds create suspense in so many classic novels and films. This compelling and fascinating account of the history of sparklers around the world will appeal to all who covet, as well as all who despise, the unparalleled brilliance and glitter of the diamond.

The Diamond's Journey Susanne Steiner, 2017-09-28 The Diamond's Journey begins in California in 2005, when a woman receives a diamond ring as part of an inheritance. She is the fourth person she knows of to have worn the ring. Upon discovering the ring is over 100 years old, she realizes there must have been others who had the opportunity to wear the ring as well. This launches the story of how and where the diamonds were discovered, the trader who obtained them, their journey to France, only to be sold in their raw state to an American collector, who re-sells them to the famed JP Morgan, who gives them as a bonus to a young protégé, who has them cut and polished in the new 'ideal cut' in order to propose to his future bride. The ring is then left in a drawer and forgotten until it is found again and used to negotiate freedom, as a gift for saving a life, bartered for food, presented as a gift, and re-used as an engagement ring. It is gifted in appreciation, and passed down from a mother to a daughter, and then a daughter-in-law.

Diamond In The Rough Doris D Jones, 2021-03-06 Looking back at my life, one thing stands out, the struggle. Learning how to make do with a little of nothing and be thankful for the crumbs from others table was hard. I grew up in a harsh environment. There was physical, mental, and sexual abuse. This type of environment teaches you to use the most primal survival skills. I remember watching mom get up at three o'clock in the morning everyday to walk to work. She worked at the Columbus city courthouse. No matter the weather she was always there. Every day like clockwork she was there regardless of the weather getting it in. I remember seeing her wrap her hands in old socks to stay warm. Her shoes were running over from walking so many miles. I didn't understand at first, but time and error have shown me that she did what she knew to do for her children. It was her way of showing us she loved us the only way she knew how. I ended up doing the same thing for my children, following in her footsteps. Just like we took mom for granted my children did the same to me, take me for

granted. I worked to provide a better life than I was able to afford as a child. My mom showed me that having children was a full-time job that you wanted to do, because the reward was priceless. The heartache and pain of a childbirth was only a prelude of what was to come, yet it's more than worth the indescribable joy and pride. When you can see how well they turn out. July twenty-fifth nineteen eighty, I found a reason to live and to strive. His name is Alandrew Ed Rodrick Jones, He was five pounds and three ounces, red wrinkled and squirming. The true beginning of my adult journey. I wasn't alone anymore. I had someone to love me.

My Diamond, 2019-10-30 A collection of poems including formal and free verse.

Accompany Tamika on her journey.....and read how she proved to herself and to so many others who had given up on her, a deep-seated power and self-belief that defied belief. Diamonds in the Dew Nora Stanger, 2003-09 Chasing the Light is an action adventure, romantic comedy with a unique sci-fi twist. But once the characters reach the refuge of the high Sierras, it becomes a heartwarming journey of discovery. Michelle Rousseau is a very intelligent research scientist who has developed an advanced Virtual Reality system that can be used in the real world. Tom Bryant is a nature photographer who spends weeks at a time immersed in the wilderness of the high Sierras. Alvin is a sentient being from another world who explores the galaxy by beaming a virtual version of himself and his entire civilization by stages to likely planets that might have intelligent life. When he arrives on earth his transmission is so immense that he ends up scattered all over the World Wide Web in millions of computers, causing havoc to businesses, governments, and law enforcement agencies. By a chance meeting Alvin is able to contact Tom through

Michelle's VR glasses and tells him what happened. Michelle helps him build an advanced computer so he can retrieve the rest of himself before they are caught by the military and dozens of other agencies trying to find the one responsible for a looming world wide disaster. But if Alvin is detained or disconnected from the web, another transmission, much more powerful than the one he came in on, will disable most of the computers on the planet. They reach the refuge of the high Sierras, where Alvin can use a satellite dish to access the Web, while Tom and Michelle go on a lot of personal adventures, trying to hide in a remote wilderness. Alvin is intensely curious about earth, and asks a lot of innocent questions about love and human relationships. Michelle had been hurt in a lot of her relationships and has a hard time trusting anyone. She is a beautiful woman, but her beauty had always been a handicap for her in the business world. Men saw her as a trophy, something to conquer and possess. Tom is a passionate artist who loves the outdoors. He spends most of their time in the mountains putting Michelle in situations she isn't used to, trying to get her to really trust him. Their lives are in each other's hands, and Tom knows that he'll never reach her until she learns how to trust again.
