Phyllis Plous, University of California, Santa Barbara. University Art Museum

Late City Robert Olen Butler, 2021-09-07 The Pulitzer Prize-winning author shares an “exceptionally nuanced, tender, funny, tragic, and utterly transfixing portrait” of one man’s troubled century (Booklist, starred review). At 115 years old, former newspaperman Sam Cunningham is also the last surviving veteran of World War I. As he prepares to die in a Chicago nursing home, the results of the 2016 presidential election come in—and he finds himself in a wide-ranging conversation with a surprising God. As the two review Sam’s life, the grand epic of the twentieth century comes sharply into focus. Sam grows up in Louisiana under the flawed morality of an abusive father. Eager to escape, Sam enlists in the army while still underage. Though the hardness his father instilled in him helps him make it out of World War I alive, it also prevents him from contending with the emotional wounds of war. Back in the United States, Sam moves to Chicago to begin a career as a newspaperman that will bring him close to the major historical turns of the twentieth century. There he meets his wife and has a son, whose fate counters Sam’s at almost every turn. As he contemplates his relationships—with his parents, his brothers in arms, his wife, his editor, and most importantly, his son—Sam is amazed at what he still has left to learn about himself after all these years.

The dramatic voices of the characters contrast with the subjective voice of the narrator as he moves through time and space, remembering and anticipating.

A Company of Scientists Alice Stroup,1990 Who pays for science, and who profits? Historians of science and of France will discover that those were burning questions no less in the seventeenth century than they are today. Alice Stroup takes a new look at one of the earliest and most influential scientific societies, the Académie Royale des Sciences. Blending externalist and internalist approaches, Stroup portrays the Academy in its political and intellectual contexts and also takes us behind the scenes, into the laboratory and into the meetings of a lively, contentious group of investigators. Founded in 1666 under Louis XIV, the Academy had a dual mission: to advance science and to glorify its patron. Creature of the ancien régime as well as of the scientific revolution, it depended for its professional prestige on the goodwill of monarch and ministers. One of the Academy's most ambitious projects was its illustrated encyclopedia of plants. While this work proceeded along old-fashioned descriptive lines, academicians were simultaneously adopting analogical reasoning to investigate the new anatomy and physiology of plants. Efforts to fund and forward competing lines of research were as strenuous then as now. We learn how academicians won or lost favor, and what happened when their research went wrong. Patrons and members shared in a new and different kind of enterprise that may not have resembled the Big Science of today but was nevertheless a genuine company of scientists.
