Gems and Precious Stones of North America George Frederick Kunz, 2016-11-16 Excerpt from *Gems and Precious Stones of North America: A Popular Description of Their Occurrence, Value, History, Archaeology, and of the Collections in Which They Exist*, Also a Chapter on Pearls and on Remarkable Foreign Gems Owned in the United States The daily yield from the coal and iron mines, or from the South African diamond mines, or a week's yield of the granite quarries, would exceed in value the entire output of precious stones found in the United States during a year. Systematic search for gems and precious

stones has been carried on in only two States Maine and North Carolina. Otherwise, the gems are found accidentally, in connection with other substances that are being mined, or in small veins which are only occasionally met with, as the turquoise in Mexico. They are often gathered on the surface, as is the case with garnet or olivine from Arizona and New Mexico; or in sluicing for gold, as the sapphires from Montana; or in connection with mica mining, as the beryl from Connecticut and North Carolina; or from the beds of streams and decomposing rocks, as the moss-agate from Wyoming; or on the beaches, as the agate, chlorastrolite, and thomsonite from the shores of Lake Superior. Diamonds and Precious Stones Harry Emanuel, 2017-12-04 Excerpt from *Diamonds and Precious Stones: Their History, Value, and Distinguishing Characteristics, With Simple Tests for Their Identification* At the time that the African diamond fields were discovered there was only one diamond cutter in London. Dutchmen were accordingly engaged to work in London from Monday morning till Friday sunset, and they were 1 to receive 10 per week each man. There was a very large supply of rough diamonds to be cut, so they struck several times successfully for higher wages. They would allow no person to be in the room that they worked in, being afraid the secrets of their art might be discovered. At least they demanded 18 per week each man, when they were discharged and English precious gem cutter-aware put at the work. At first they were only able after a deal of trouble to cut a class of diamond in one month which they could now cut in about four days. As soon as it was clearly proved that Englishmen had once more gained the art, the Worshipful Company of Turners had their attention called to it by their Past Masters, the late Professor Tennant, the Queen's Mineralogist, and Mr. John 'Jones.' They at once decided to give English cutters every encouragement, and have, with the valuable assistance of the Baroness and Mr. Burdett-Coutts, who are both members of this company, offered money awards in competition against the Dutch for the best cut diamonds. After several contests the Englishmen gained the first prize and most of the others. Great credit and thanks are due to this company and the Baroness and Mr. Burdett-Coutts for giving such valuable assistance to this industry. the Most Famous Gems; Gem Cutting and Engraving, and the Artificial Production of Real and of Counterfeit Gems In addition to the strictly scientific information to be given regarding precious stones, there are connected with them a great many facts not less interesting, and equally important for the public to know. To these we have devoted several sections of the following work. In our times precious stones are, used almost exclusively for the purpose of ornament, but in former times the case was very different. By reference to the authors of antiquity, as well as to those of the middle ages and the Renaissance, we have shown the important part that they then played, and what ideas prevailed regarding them. A Hand-Book of Precious Stones (Classic Reprint) Meyer D. Rothschild, 2017-11-22 Excerpt from A Hand-Book of Precious Stones The changes of fashion have much to do with determining the market value of precious stones. Amethysts, topazes, cat's-eyes, aquamarines, alexandrites, and even emeralds and opals have been eagerly, sought for at times and then again neglected for other gems, causing a sensible difference in the value of these stones. Precious Objects Alicia Oltuski, 2011-07-19 In the middle of New York City lies a neighborhood where all secrets are valuable, all assets are liquid, and all deals are sealed with a blessing rather than a contract. Welcome to the diamond district. Ninety percent of all diamonds that enter America pass through these few blocks, but the inner workings of this mysterious world are known only to the people who inhabit it. In Precious Objects, twenty-six-year-old journalist Alicia Oltuski, the daughter and granddaughter of diamond dealers, seamlessly blends family narrative with literary reportage to reveal the fascinating secrets of the diamond industry and its madcap characters: an Elvis-impersonating dealer, a duo of diamond-detective brothers, and her own eccentric father. With insight and drama, Oltuski limns her family's diamond-paved move from communist Siberia to a displaced persons camp in post-World War II Germany to New York's diamond district,

exploring the connections among Jews and the industry, the gem and its lore, and the exotic citizens of this secluded world. Entertaining and illuminating, Precious Objects offers an insider's look at the history, business, and society behind one of the world's most coveted natural resources, providing an unforgettable backstage pass to an extraordinary and timeless show.
