Yavneh Raz Kletter, Irit Ziffer, Wolfgang Zwickel, 2010 In the words of late Professor Moshe Kochavi, the Philistine repository pit at Yavneh is the kind of discovery made only once every fifty years. It is the richest repository pit ever found from Bronze and Iron Ages Israel/Palestine, containing thousands of cultic finds originating from a temple, including an unprecedented number - more than a hundred - of cult stands (so-called 'architectural models') carrying rich figurative art, dozens of fire-pans, chalices and other objects. The present volume includes the full publication of the excavation, the stratigraphy, the cult stands and the figures detached from cult stands, several clay and stone altars and some pottery vessels related to burning of plant material, most likely incense. This exceptional book raises a host of highly important and intriguing questions. Is this a favissa, or even a genizah? Why are many cult stands badly broken, while some are intact - were cult stands broken on purpose? What is the explanation for the unique stratigraphy and for the layer of gray ash in the pit - was fire kindled inside as part of a ritual? How do we know that these finds are Philistine? Are they part of the 'furniture' of the temple or objects dedicated by worshippers as votives? Do the figures on the cult stands represent mortal beings, or divinities? If divinities, can we relate them with Biblical or extra-biblical data on the gods of the Philistines? What was the function/s of cult stands? Were they models of buildings, supports for images, offering tables, altars, or perhaps incense burners? Why are female figures dominant, while male figures are virtually absent? In discussing such topics, Yavneh I treats issues that are central to many fields of study: religion and cult in Iron Age Israel/Palestine; the history and archaeology of the Philistines and their 'western' relations; Near Eastern iconography, the meaning of cult stands/architectural models and the understanding of votive objects and of repository pits in general. Literally salvaged from the teeth of a bulldozer, these rare finds are now published. Generations of scholars will discuss and reinterpret them - there is no 'final word' for such finds and hence, this final excavation volume is not an end, but a beginning.

Innovative Technologies and Services for Smart Cities Subhas Mukhopadhyay,Tarikul Islam,2019-09-02 A smart city is a modern technology-driven urban area which uses sensing devices, information, and communication technology connected to the internet of things (IoTs) for the optimum and efficient utilization of infrastructures and services with the goal of improving the living conditions of citizens. Increasing populations, lower budgets, limited resources, and compatibility of the upgraded technologies are some of the few problems affecting the implementation of smart cities. Hence, there is continuous advancement regarding technologies for the implementation of smart cities. The aim of this Special Issue is to report on the design and development of integrated/smart sensors, a universal interfacing platform, along with the IoT framework, extending it to next-generation communication networks for monitoring parameters of interest with the goal of achieving smart cities. The proposed universal interfacing platform with the IoT framework will solve many challenging issues and significantly boost the growth of IoT-related applications, not just in the environmental monitoring domain but in the other key areas, such as smart home, assistive technology for the elderly care, smart city with smart waste management, smart E-metering, smart water supply, intelligent traffic control, smart grid, remote healthcare applications, etc., signifying benefits for all countries.

Poets Laureate in the Holy Roman Empire John Flood,2011-09-08 Petrarch's revival of the ancient practice of laureation in 1341 led to the laurel being conferred on poets throughout Europe in the later Middle Ages and the Early Modern period. Within the Holy Roman Empire, Maximilian I conferred the title of Imperial Poet Laureate especially frequently, and later it was bestowed with unbridled liberality by Counts Palatine and university rectors too. This handbook identifies more than 1300 poets laureated within the Empire and adjacent territories between 1355 and 1804, giving (wherever possible) a sketch of their lives, a list of their published works, and a note of relevant scholarly literature. The introduction and various indexes provide a detailed account of a now largely forgotten but once significant literary-sociological phenomenon and illuminate literary networks in the Early Modern period. A supplementary Volume 5 of *Poets Laureate in the Holy Roman Empire*. A Bio-bibliographical Handbook will be published in June 2019.
