Poets Laureate in the Holy Roman Empire John Flood,2011-09-08 Petrarch's revival of the ancient practice of laureation in 1341 led to the laurel being conferred on poets throughout Europe in the later Middle Ages and the Early Modern period. Within the Holy Roman Empire, Maximilian I conferred the title of Imperial Poet Laureate especially frequently, and later it was bestowed with unbridled liberality by Counts Palatine and university rectors too. This handbook identifies more than 1300 poets laureated within the Empire and adjacent territories between 1355 and 1804, giving (wherever possible) a sketch of their lives, a list of their published works, and a note of relevant scholarly literature. The introduction and various indexes provide a detailed account of a now largely forgotten but once significant literary-sociological phenomenon and illuminate literary networks in the Early Modern period. A supplementary Volume 5 of Poets Laureate in the Holy Roman Empire. A Bio-bibliographical Handbook will be published in June 2019.

A Study of Crisis Michael Brecher,Jonathan Wilkenfeld,2022-06-07 As the twentieth century draws to a close, it is time to

look back on an epoch of widespread turmoil, including two world wars, the end of the colonial era in world history, and a large number of international crises and conflicts. This book is designed to shed light on the causes and consequences of military-security crises since the end of World War I, in every region, across diverse economic and political regimes, and cultures. The primary aim of this volume is to uncover patterns of crises, conflicts and wars and thereby to contribute to the advancement of international peace and world order. The culmination of more than twenty years of research by Michael Brecher and Jonathan Wilkenfeld, the book analyzes crucial themes about crisis, conflict, and war and presents systematic knowledge about more than 400 crises, thirty-one protracted conflicts and almost 900 state participants. The authors explore many aspects of conflict, including the ethnic dimension, the effect of different kinds of political regimes--notably the question whether democracies are more peaceful than authoritarian regimes, and the role of violence in crisis management. They employ both case studies and aggregate data analysis in a Unified Model of Crisis to focus on two levels of analysis--hostile interactions among states, and the behavior of decision-makers who must cope with the challenge posed by a threat to values, time pressure, and the increased likelihood that military hostilities will engulf them. This book will appeal to scholars in history, political science, sociology, and economics as well as policy makers interested in the causes and effects of crises in international relations. The rich data sets will serve researchers for years to come as they probe additional aspects of crisis, conflict and war in international relations. Michael Brecher is R. B. Angus Professor of Political Science, McGill University. Jonathan Wilkenfeld is Professor and Chair of the Department of Government and Politics, University of Maryland. They are the coauthors of *Crises in the Twentieth Century: A Handbook of International Crisis*, among other books and articles.

The Development of Children's Thinking Jeremy Carpendale,Charlie Lewis,Ulrich Muller,2017-11-27 The Development of Children's Thinking offers undergraduate and graduate students in psychology and other disciplines an introduction to several core areas of developmental psychology. It examines recent empirical research within the context of longstanding theoretical debates. In particular, it shows how a grasp of classic theories within developmental psychology is vital for a grasp of new areas of research such as cognitive neuroscience that have impacted on our understanding of how children develop. The focus of this book will be on infancy and childhood, and it looks at: Theories and context of development How

developmental psychology attempts to reconcile influences of nature and nurture Communication in infancy as a precursor to later thinking Language development in primates and young children Cognitive and social development, including the child's understanding of the mind How studies of moral reasoning reflect upon our understanding of development
