## Greg Valerio

*Making Trouble* Greg Valerio, 2013-09-20 Fair trade jewellery has been around for a while - but while those crafting it worked under Fair Trade principles, the gold, silver and precious stones they were using came from some very murky places. Small scale mining is the second biggest global employer, and many of those mines pay a pittance, forcing their workers to labour long hours in dirty and dangerous conditions - for a pittance. Informed by those in the jewellery trade that this would never change, Greg Valerio set out to prove them wrong. Fairly traded gold is now available in the UK, although the battle continues for other metals and products.

*Gemologue* Liza Urla, 2018 Liza Urla is the author of the jewelry blog, *Gemologue* <https://gemologue.com/tag/jewelry-blog>

*New York Magazine*, 1992-10-12 *New York Magazine* was born in 1968 after a run as an insert of the *New York Herald Tribune* and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

*Castellani and Italian Archaeological Jewelry* Susan Weber Soros, Stefanie Walker, Bard Graduate Center for Studies in the Decorative Arts, 2004-01-01 During the nineteenth century in Rome, three generations of the Castellani family created what they called "Italian archaeological jewelry," which was inspired by the precious Etruscan, Roman, Greek, and Byzantine antiquities being excavated at the time. The Castellani jewelry consisted of finely wrought gold that was often combined with delicate and colorful mosaics, carved gemstones, or enamel. This magnificent book is the first to display and discuss the jewelry and the family behind it. International scholars discuss the life and work of the Castellani, revealing the wide-ranging aspects of the family's artistic and cultural activities. They describe the making and marketing of the jewelry, the survey collection of all periods of Italian jewelry on display in the Castellani's palatial store, and the Castellani's activities in the trade of antiquities, as they sponsored excavations, and restored, dealt, and exhibited antiques. They also recount the family's involvement in the cultural and political life of their city and country.

33 Artists in 3 Acts Sarah Thornton, 2014-11-03 This compelling narrative goes behind the scenes with the world's most important living artists to humanize and demystify contemporary art. The best-selling author of *Seven Days in the Art World*

now tells the story of the artists themselves—how they move through the world, command credibility, and create iconic works. *33 Artists in 3 Acts* offers unprecedented access to a dazzling range of artists, from international superstars to unheralded art teachers. Sarah Thornton's beautifully paced, fly-on-the-wall narratives include visits with Ai Weiwei before and after his imprisonment and Jeff Koons as he woos new customers in London, Frankfurt, and Abu Dhabi. Thornton meets Yayoi Kusama in her studio around the corner from the Tokyo asylum that she calls home. She snoops in Cindy Sherman's closet, hears about Andrea Fraser's psychotherapist, and spends quality time with Laurie Simmons, Carroll Dunham, and their daughters Lena and Grace. Through these intimate scenes, *33 Artists in 3 Acts* explores what it means to be a real artist in the real world. Divided into three cinematic acts—politics, kinship, and craft—it investigates artists' psyches, personas, politics, and social networks. Witnessing their crises and triumphs, Thornton turns a wry, analytical eye on their different answers to the question What is an artist? *33 Artists in 3 Acts* reveals the habits and attributes of successful artists, offering insight into the way these driven and inventive people play their game. In a time when more and more artists oversee the production of their work, rather than make it themselves, Thornton shows how an artist's radical vision and personal confidence can create audiences for their work, and examines the elevated role that artists occupy as essential figures in our culture.

Portable Art Celia Forner, 2017 Celia Forner has collaborated with 15 contemporary artists to create objects which defy a conventional definition of jewellery, sitting somewhere between sculpture and wearable art. These artists' designs are crafted from a variety of materials, ranging from traditional gold and silver with precious and semi-precious gems to enamel, aluminium, bronze and iron. Beginning with an exquisitely crafted gold cuff by Louise Bourgeois, the project has evolved to include artists such as John Baldessari, Phyllida Barlow, Stefan Brüggemann and Subodh Gupta. The catalogue features extensive illustrations, including photos of actress Rosy de Palma modeling the various creations. Quotes from the artists themselves offer perspective into their creations and the inspiration behind them. Exhibition: Hauser & Wirth, New York, USA (20.04.-17.06.2017).

**Georgian Jewellery 1714-1830** Ginny Redington Dawes, Olivia Collings, 2018 Georgian Jewellery is a celebration of the style and excellence of the eighteenth century, and of the ingenuity that produced such a wealth of fabulous jewellery. Heavy academic tomes have already been written about the period, but this book examines it in a more colourful and accessible way. The book aims to show that Georgian jewellery is not only the stuff of museums and safe boxes, but that it can be worn as elegantly and fashionably today as it was 200 years ago. Much disparate information about the jewellery has been gathered together and the period is brought alive by portraits and character sketches of famous Georgians in their finery, fashion tips, gossip, and some rather outrageous cartoons of the time, as well as fascinating recently discovered facts. With information on how to identify, buy and repair pieces, this sumptuously illustrated volume contains the largest single

catalogue of 18th Century jewellery. AUTHORS: Ginny Redington Dawes, a life-long collector of antique jewellery, has written two previous books on the subject - The Bakelite Jewellery Book and Victorian Jewellery. Staff writer for MGM Screengems Music, she is also a successful composer; she wrote the book, music and lyrics for the off-Broadway show The Talk of the Town and has won a CLEO award for music for advertising. Olivia Collings became fascinated by the seventeenth century alchemist and jeweller Christopher Pinchbeck at an early age and bought her first piece of antique jewellery aged seven. She trained in an exclusive Bond Street antique jewellery shop before starting her own business in 1975 and has continued learning about and dealing in Georgian jewellery ever since. She is now an independent jewellery consultant. SELLING POINTS: \* A thoroughly researched look at the jewellery of the time, offering good basic knowledge for the beginner and new facts for the expert \* New and/or little-known facts about the techniques, styles and materials of the age \* The only book solely on the Georgian period, and the largest ever catalogue of the diverse range of eighteenth century jewellery \* Interesting portraits of characters of the period and their influence on the jewels of the time, with some contemporary gossip, outrageous cartoons and period fashion tips \* Emphasis on jewellery that has been on the open market in recent years, rather than just unobtainable museum pieces 295 colour, 7 b/w images

**Women In Their Element: Selected Women's Contributions To The Periodic System** Lykknes Annette, Van Tiggelen Brigitte, 2019-08-05 This year we celebrate the 150th anniversary of Mendeleev's first publication of the Periodic Table of Elements. This book offers an original viewpoint on the history of the Periodic Table: a collective volume with short illustrated papers on women and their contribution to the building and the understanding of the Periodic Table and of the elements themselves. Few existing texts deal with women's contributions to the Periodic Table. A book on women's work will help make historical women chemists more visible, as well as shed light on the multifaceted character of the work on the chemical elements and their periodic relationships. Stories of female input, the editors believe, will contribute to the understanding of the nature of science, of collaboration as opposed to the traditional depiction of the lone genius. While the discovery of elements will be a natural part of this collective work, the editors aim to go beyond discovery histories. Stories of women contributors to the chemistry of the elements will also include understanding the concept of element, identifying properties, developing analytical methods, mapping the radioactive series, finding applications of elements, and the participation of women as audiences when new elements were presented at lectures. As for the selection of women, the chapters include pre-periodic table contributions as well as recent discoveries, unknown stories as well as more famous ones. The main emphasis will be on work conducted in the late 19th century and early 20th century. Furthermore, the book includes elements from different groups in the periodic table, so as to represent a variety of chemical contexts. 'As with the discoveries themselves, bringing these tales of female scientists to light has taken much teamwork, including by contributors Gisela Boeck, John Hudson, Claire Murray, Jessica Wade, Mary Mark Ockerbloom, Marelene Rayner-Canham, Geoffrey Rayner-Canham, Xavier Roqué, Matt Shindell and Ignacio Suay-Matallana. Tracing women in the history of chemistry unveils a fuller picture of all the people working on scientific discoveries, from unpaid assistants and technicians to leaders of great labs. In this celebratory year of the periodic table, it is crucial to recognize how it has been built — and continues to be shaped — by these individual efforts and broad collaborations.' *Nature* 565, 559-561 (2019)

*Professional Goldsmithing: A Contemporary Guide to Traditional Jewelry Techniques* Alan Revere, 1991-06-06 The book examines a series of practical goldsmithing projects, each of which has been successfully completed by student goldsmiths using its instructions ... The creation of rings, chains, bracelets, earrings, and clasps, the use of specialized tools, as well as hand positions, movements, and technical data are described in lucid text and demonstrated with an abundance of detailed color photos--Cover.

Ruby and Sapphire Richard W. Hughes, Wimon Manorotkul, E. Billie Hughes, 2017-01-01 From the dawn of time, ruby and sapphire have both attracted and fascinated humans in ways that few other items could. While objects of desire are found throughout the natural world, physical beauty is too often ephemeral. From the allure of a man, woman, flower or butterfly, through the fleeting moments of a sunset, there is little that lasts and practically nothing that can be passed down to our descendants. The exception is precious stones. Not only are they the most durable creations of mother nature, but their visual splendor is truly eternal. In this companion to his 2013 book, *Ruby & Sapphire--A Collector's Guide*, Richard Hughes examines these gems from the gemological standpoint, delving into these gems not just from the aesthetic, but also from the scientific point of view. The product of nearly 40 years of firsthand experience, it covers every aspect of the subject from A-Z. History, sources, prices, quality analysis, synthetics and treatments, everything is here. *Ruby & Sapphire--A Gemologist's Guide* represents the most comprehensive book ever written on a single precious stone. With over 1000 photos, maps and illustrations and 3500 references, it is nothing less than a tour-de-force of gemological scholarship.

**Hallmarks of the Southwest** Barton Wright, 2000-01-01 American Southwest Indian artists working in metal, clay, wood, textiles, and paint have proudly left their individual hallmarks on their work--and until now there has not been a comprehensive source for identifying the marks. Barton Wright, the pre-eminent historian, curator, and proponent of these native crafts-people, has filled that void by collecting and organizing these hallmarks into a useful book. Compiled over many years of work with the craftspeople, and with the cooperation of one of their main organizing bodies, the Indian Arts and Crafts Association, Mr. Wright has with this book both made a useful tool for identification and left an important record of the work of these talented people. The information is alphabetically arranged with important personal data, tribal affiliation, working dates, materials used, and facsimiles of their marks.

**The Paintings of Claude Monet** Oscar-claude Monet, 2011-12-11 Claude Monet (1840-1926) was a founder of French impressionist painting, and the most consistent and prolific practitioner of the movement's philosophy of expressing one's perceptions before nature, especially as applied to 'plein-air' landscape painting. The term Impressionism is derived from the title of his painting *Impression, Sunrise* (*Impression, 'soleil levant'*). This book is the most comprehensive collection of Claude Monet's Paintings ever published, covering the artist's entire 64 years of creation; a keepsake for the connoisseur of fine art. On 484 pages, this book includes a detailed biography, a resume written by Monet himself (in English and French), and over

900 paintings on 460 colour plates (large format 8½ x 11 inches), as well as a special section of Monet's famous Water Lilies Series, and the Series of the London Parliament Buildings and Bridges. Monet's paintings obtain record prices at auctions. 'Le Pont du chemin de fer à Argenteuil,' an 1873 painting of a railway bridge spanning the Seine near Paris, was bought for a record \$41.4 million at Christie's auction in New York on 6th May 2008. The previous record for Monet's painting stood at \$36.5 million. 'Le bassin aux nymphéas' (from the water lilies series) sold at Christie's 24 June 2008 for £40,921,250 (\$80,451,178) setting a new auction record for the artist.
